WATER INLET TEMPERATURE 90 °F

### CABINET

One piece easy to remove, high density polyethylene plastic cabinet. Our cabinets are designed to eliminate problems of rust, corrosion and have a superior resistance to UV degradation. Our one-piece blow molded cabinet is designed to allow easy cleaning and quick cabinet removal for convenient service. Each cooler has a handle on the back that enables easy transport. The cabinet can easily be removed for convenient service and maintenance.

### COLD WATER TANK

Convection cooled condenser, internally spring mounted hermetically sealed compressor with an automatic overload protector. No lubricant needed. Refrigerant is controlled by accurately calibrated capillary tube.

### HOT WATER TANK

Hygienic stainless steel tank with a highly efficient internal heating element. Non-adjustable thermostat with manual reset safety limiter. Conveniently located hot water ON/OFF switch. New energy savings hot water tank with new Energy Star 2.0 requirements.

### HOT WATER THERMOSTAT

Water Temperature is controlled to nearly 185 F by an automatic thermostat. ON/OFF switch is easily accessible on back.

### COLD WATER THERMOSTAT

Temperature is controlled to 39.2 °F ~50 °F by adjustable thermostat, easily accessible on back.

### FRAME

Two galvanized steel struts and an internal metal frame insure cooler stability and impact resistance.

### STANDARDS

Specifications are subject to the international standards.

### LG BRAND COMPRESSOR

All Clover coolers come standard with a LG brand compressor. Each cooler has LG's highest quality compressor with the low cycle rates. (manufactured in South Korea not China).

### OPTIONS

#### CUP DISPENSER
